

Programme Data Sheet

LeaseUSA is a unique programme developed by Technology Leasing to assist exporters to North America offer clients a finance solution for products.

Over the past year we have been approach by several of our clients to organise lease programmes for their customers in North America.

There are a number of logistical issues surrounding cross border lease agreements. The supplier is paid in one currency, while the client pays in another; different countries have different legal regimes and contract law; not to mention the time and effort it takes to drive a deal through. So in reality what has happened up until now, is the client is left to organise their own financing. Leaving a client to do their own finance arrangement, means giving away control of the deal and by relinquishing control, time delays occur and even worse competitors can creep into the equation.

Through Technology Leasing all exporters to North America now have a simple lease solution to offer clients.

LeaseUSA enables partners: -

- Cross border lease agreements
- Payment within 4 days
- Complete control of each deal
- Additional selling point
- Improve cash flow
- Low effort high impact

LeaseUSA

'flexible foreign finance'
